

Texas Commission on Environmental Quality

INTEROFFICE MEMORANDUM

To: Luda Voskov, Project Manager;
SSDAP/Superfund Section, Remediation
Division

Date: July 27, 2010

From: Larry Champagne; Technical Support Section, Remediation Division

Subject: Gulfco Marine Maintenance NPL Superfund Site
Revised Final Baseline Ecological Risk Assessment Problem Formulation
Revised Final Baseline Ecological Risk Assessment Work Plan & Sampling and
Analysis Plan
June 22, 2010

I have completed my review of these revised documents and the associated responses to comments. Although there may be a few questions on sample locations and minor text wording, based on the conference call today with EPA and the Gulfco representatives, I believe that pursuing the Engineering Evaluation/Cost Analysis (EE/CA), which serves as a streamlined Remedial Investigation/Feasibility Study, is the best path forward and therefore have no further comments on these documents. Any sample location questions can be addressed during the EE/CA process.
